O.C. Bobbschell  
Supt. U.S. Mint, Phila. Pa.,

My dear Sir

Yours of the 13<sup>th</sup> rec<sup>d</sup>.

I do not think you will find any more of the wrongly alloyed blanks. We have given close attention to the matter and we do not find any of them here. In some circumstances a bar of metal of wrong mixture has been finished the gauge width of the bronze penny metal. The wrong blanks are so different in color from the bronze blanks it would seem almost impossible that they could pass your inspectors when examining boards. If they should get so far as that, Muldall will have to put a recurrence of this trouble.

Yours truly  
C.P. Goss Treas.

[Abstract:] Explaining cause of defective blanks

The Scovill Mfg. Company  
Waterbury, Conn.,

November 14, 1890

O.C. Bosbyshell  
Supt. U.S. Mint, Philadelphia, Pa.

My dear Sir

Yours of the 13 received. I do not think you will find any more of the wrongly alloyed blanks, we have given close attention to the matter and we do not find any of these here. I've since encountered today a bar of metal of wrong mixture has been finished the gauge width of the bronze penny metal. The wrong blanks are so different in color from the bronze blanks it would seem impossible that they could pass your inspectors when on counting boards if they should get so far along as that. We will do all in our power to prevent a reoccurrence of this trouble.

Yours truly  
C.P. Goss  
Treasurer
